

How to Download and install ISO Opener

Go to : <http://www.isoopener.com/> click on **Download**

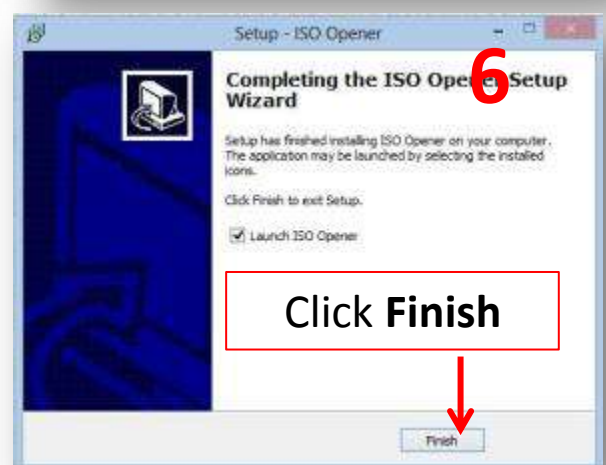

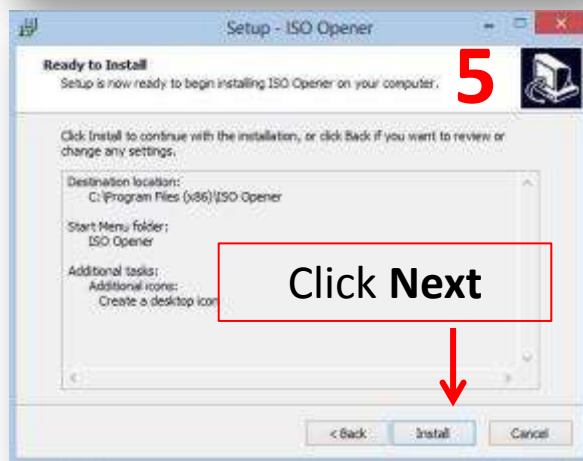

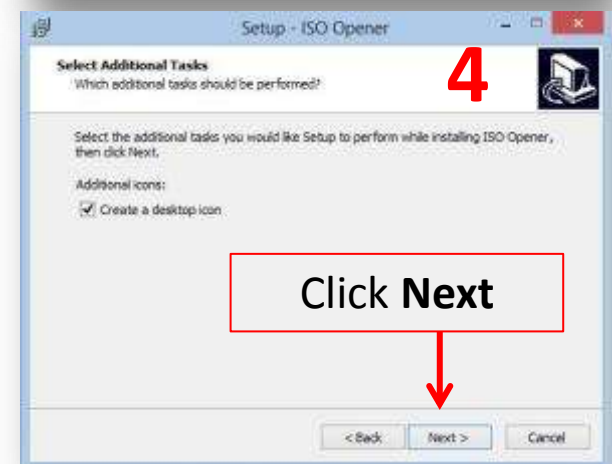

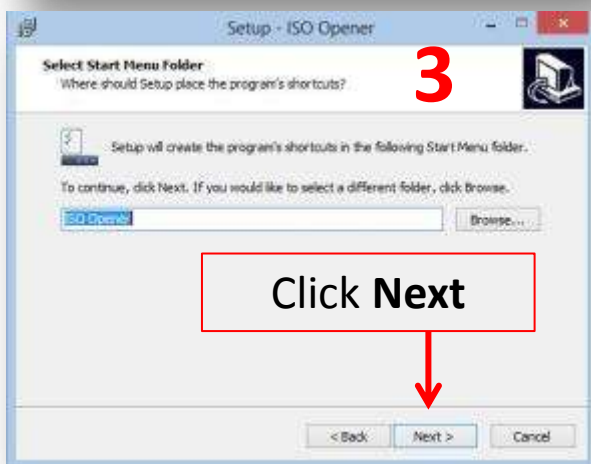

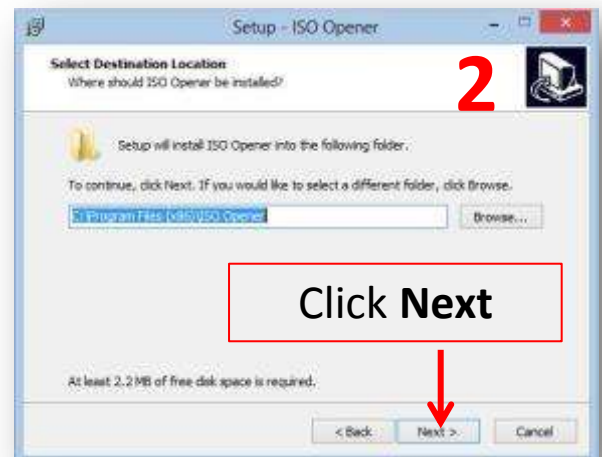

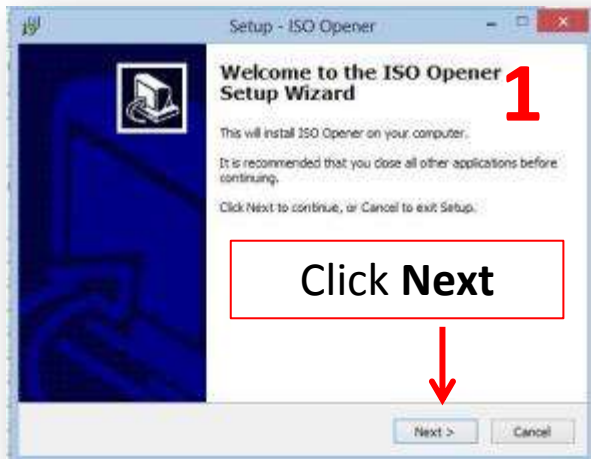

Save the file to your computer

Navigate to your downloads folder or where you downloaded the file to. Double click on the file to install isoopener.

You may receive a message from Windows asking if you allow this program to make changes to your computer – click **Allow**

It is now just a matter of following the wizard through the installation process

When you click on **Finish** in **step 6** if you have a tick in the Launch ISO Opener box the program will open ready to use –if not you will have to go to Start All Programs to find it and open from there

Click Finish to exit Setup.

Launch ISO Opener

You are now ready to use ISO Opener to unpack your ,iso file
